Hallo,

hier ein Patient von Dr. Bisanga, der sich einer 2 Tages FUE mit 4300FUE unterzogen hat.
Sein Originalkommentar aus einem anderen Forum lautet:
"I chose Dr Bisanga as I have always been a fan of his natural looking hairlines and more importantly, an ethical approach with regards long term planning.

The days were long but went smoothly from start to finish. Dr Bisanga finalised my hairline design in the morning after a discussion about the fact that I may not be able to tolerate taking finasteride.

A relatively conservative hairline was therefore drawn and the plan was to use approximately 4000 grafts to give a better frame to my face and fill back into the mid scalp, leaving a section where there was already hair and give some coverage to the crown area.

I asked about donor density and I believe it was above average at 80+ grafts per square cm. According to doctor Bisanga, I have approximately 8000 fue follicular units in total so a bit in the bank for future work when needed."

Der Graftcount lautete:

Single FUs 679 grafts
Double FUs 2312 grafts
Treble FUs 1600 grafts
Quadruple FUs 709 grafts

Total grafts :- 4300

Der Patient hat uns seine Bilder mit Gesicht zur Verfügung gestellt und die post Op Bilder auch selber gemacht!

hier der Vergleich vor und nach 11, 5 Monaten:
