Sabine Dillen is a professional tricopigmentation practitioner and has been working at Prohairclinic since 2004.

Her dedication and first goal was to improve upon the FUE technique which had been introduced by Prohairclinic back in 2004.

Along with surgeons like Dr. De Reys and Dr. Ilter she helped improving special FUE routines and instruments;

As of 2012 she became fascinated by tricopigmentation after seeing a tricopigmentation patient in real life.

Adopting this technique within the clinic has been her achievement.

Anno 2018 Sabine is one of the most experienced tricopigmentation practitioners in France, Germany, Belgium and Holland.

Since she speaks fluent English, German, Dutch and French there are no language barriers.

Here is more of her recent work:
