„TRT+“ may safe my hairline after just 4 weeks

I started balding 2-3 years ago, it never once grew back and I tried a lot of things. First Picture is from january, after a long natural diet and with tanked hormones, where my hairline is at its lowest.

2nd picture is from today, just after 4 weeks of starting with 2x125mg Test E/week. Also no alc. and drugs, clean diet, low bf, enough sleep & rest, health ancillaries and 2 days training - 2 days rest & repeat.
