Apologies for using English language, I am from UK and still learning German.

I have created this account to know about any doctor in Munich who can prescribe me Propecia easily. I don't want any blood tests or thorough investigation of my scalp. Just require a quick prescription to get Finasteride. An English speaking doctor or dermatologist would be preferable. Also can you let me know whether my visit to doctor will be covered by insurance? I have insurance plan with AOK.

I can confirm that the IndPharma pills (Veltride and also Fincar) are fake.

I have been taking 2.5mg Ficar ED + 0.5mg Veltride EOD since Feb 2014 till now.

Continuous hairfall, hairline from NW1.5 to NW3. Crown started balding also.

I take blood test last week and got DHT levels of 67 ng/dL. The normal reference range was 35-85 ng/dL. So I'm on the high end of DHT range. Clearly the IndPharma meds have done nothing to suppress my androgen levels.

Thanks a lot for your time. And please beware of IndPharma crap. Your hair is something not worth saving money with fake Indian generics.

schon wieder so ein anti-indpharma thread...

ich hab meine duts testen lassen und die waren ok.

i think u should take dutasterid from indpharma. thats the way it is

maybe ur not a good responder of fin

Thanks for your reply.

For the peace of mind, I'd like to try original Propecia/Proscar. Do you know any doctor/dermatologist who might prescribe me? I might be a non-responder but at least there should have been some reduction in DHT levels.

Because your homecountry (for instance) is part of EU it is possible to get valid prescriptions from UK-Doctors from the internet by delivery. Do your research
