I am writing this to help those who want to prevent hair loss and for those who want to get back their natural hair.

About me and my story:

I lost 90% of all the hair on the top of the head and I tried to find clinics that could help me get back my hair. The answer I received from the different clinics in Norway and around the world was that it would take 3-4 operations and that I still had to live with hair loss on the crown. For me, this would take a lot of my time and money as well as risking not being satisfied when I was initially very skeptical about whether any clinics could deliver consistent results. I have through the years (10-11 years) tried most of the products and treatments. Together, I have probably spent nearly 300 effective hours (plus a lot of time thinking about it) and 100,000 kroner only on misunderstood treatments, consultations and travel. Possibly more.

After several years of "research" and flawed treatments I booked a consultation with Hasson & Wong in London. After the meeting I was convinced that this was the right clinic. This because I saw the results of their advisor and former patient, and I saw the results of a good friend who chose to treat Hasson & Wong. In retrospect, I have seen that they deliver consistent results time after time on new customers.

After seeing and experiencing what a hair transplant can do, if one goes to the best of them, I chose to be an advisor for Hasson&Wong to help other people. On a personal level I like to work for companies adding real value to people and who promise what they say.

Today I hold free and non-binding consultations Oslo, London, Copenhagen, Munich, Paris with several cities, at the request of customers.

For free non-binding consultation please contact me at:

thomas@hassonandwong.com

During the consultation you will see what can be achieved through a hair transplant at Hasson & Wong:

About Hasson & Wong:

"Dr. Victor Hasson and Dr. Jerry Wong are among the most experienced and respected hair transplant surgeons in the world. They are pioneers responsible for some of the most advanced technology available in hair transplant surgery today. Dr. Wong introduced the "Lateral Slit Technique" and Dr. Hasson invented the custom blade cutting device, the combination of which helped revolutionize the hair transplant industry."

The clinic has among other things treated several famous celebrities around the world.

What currently scientifically works in keeping hair and getting more hair:

Minoxidil and finasteril are the drugs that inhibit hair loss and, in some cases, increase hair growth. This is scientifically tested. If hair growth is increased, it is individual. There are many different promises on the market that are said to work well for the hair. Of all I've seen, tried and that are related to science, there is very little to none that works out of hair transplant combined with finasteril.

For questions please feel free to contact the me directly for further information:

Sincerely,

Adviser and former patient of Hasson & Wong
Thomas M. Angellsen

Hi,

If you read through the story you will see that Hasson&Wong are pioneers developing FUT technique and have been receiving prizes because what they have done in the hairtransplantation industry. You can read more about that on their website and here if you want to know more. Another fact is that Hasson & Wong is the only hair transplant clinic to safely harvest over 5000 grafts in a single session. And most important, they deliver consistent results all the time. Please contact me at my e-mail for further questions and please read for more information at their web

page.

@ Thomas M.Angellsen

Yesterday we discussed in detail the conditions of participation for commercial members, so I thought, everything was clarified. This is not the right forum area and you already take part over there in the "forum hair transplant". So please: Postings and topics all around hair restoration only over there in the other forum. Otherwise we get back into the situation, that the frequency of your activities has to be evaluated as spam.

And please create the same signatur for commercial members over there in the forum haartransplantation. I ask you again to comply with the requirements.

Best regards,
Mona

Najaaaaa, der Teilnehmer ist (offenbar neuer) Forumrepräsentant für die Hasson & Wong -

Klinik. Es spricht auch nichts dagegen, sich drüben im HT-Forum als Solcher zu beteiligen, sofern die klar definierten Regeln eingehalten werden. Aber daran werkeln wir halt noch...

Drüben haben wir mehrere englischsprachige gewerbliche Teilnehmer, die der deutschen Sprache nicht mächtig sind, das ist so gesehen nicht ungewöhnlich...

Mona;

So how do I switch over to the hairtransplantation forum? I can't log in there.

I thought everything about me is in the signature? I have already given more information in the signature here

Thomas

Thomas M.Angellsen schrieb am Thu, 22 June 2017 18:15Mona;

So how do I switch over to the hairtransplantation forum? I can't log in there....

You already posted there, just 2 days ago! 5 topics, 1 is online and 4 are out of public.

Zitat:...I thought everything about me is in the signature? I have already given more information in the signature here...

We talk about 2 different forums = 2 Logins

The signature, you created here in this forum (general forum/Allgemeines Forum) will not automaticly transfer to the forum "hair transplant". Over there you have to create it new!

Login's:

This forum = Thomas M.Angellsen + password

Forum hair transplant = Thomas Angellsen + password

!!! Please note the different spelling of your 2 accounts! Ideally the accounts should be the same in all forums on alopezie.de.

Forgotten your password?

Please click here <https://www.alopezie.de/helpdesk/index.php?a=add> (Support/Helpdesk) and then "Technische Fragen" - and I'll create a new password to sign in (forum hair transplant!).

Best regards,
Mona
